Commission's Notes:

(a) These figures are based on data provided by retailers on a 'best endeavours' basis and may be subject to revision.

(b) The energy usage is annual for customers classified as contestable or potentially contestable - not the consumption since their contestability date.

(c) Tranche 5 and Non-contestable (ie FRC) customers are set to become contestable subject to a public benefit test and review in 2002.

(d) Supply side information includes capacity sourced from independent power producers (IPPs).

Indicates data omitted because it is not relevant or because it avoids, where possible, disclosure of information on an individual customer basis.
