Dear Phillippe

Thank you for alerting us to this review seeking stakeholder input.

We have had a look at the UC's proposal and we are of the view that alignment of the Territory electricity framework with that of the NEM is a good move and has the NTMEU support.

We are aware that the AER is working on a range of issues to strengthen the structure of the NEM resulting from the implementation of the NECF and any changes in the Territory that introduce similar features is welcomed.

The robust approach taken by the UC in developing the compliance program gives us confidence that the UC will improve the outcomes for consumers and we are comfortable with the proposals embedded in the draft statement of approach on compliance.

Regards

Michael Williams
Chair NTMEU
