

Vanessa Sutcliffe
Executive Officer
Utilities Commission of the Northern Territory
GPO Box 915
Darwin NT 0801

Dear Ms Sutcliffe

RE: New Retail and Generation Licence Applications - EDL NGD (NT) Pty Ltd ("EDL")

Jacana Energy welcomes the opportunity to comment on the proposed retail and generation licence applications by EDL released by the Commission on 11 December 2014.

Jacana Energy supports the applications by EDL as we believe these will further support development of the NT electricity market and provide additional competition to deliver better outcomes for consumers.

Reform of the NT electricity market involves many aspects and identifying new procedures and processes to ensure fair and consistent application of rules and costs to all market participants. Given a range of items are yet to be confirmed (including the market operator, systems, settlements and allocation of losses) Jacana Energy suggests timing of awarding new licences align with the implementation of the new procedures to ensure ease of transition and consistency of approach.

Jacana Energy supports open and transparent development of the market and as such, members of the Jacana Energy team are available to discuss the items raised to assist in finding suitable solutions in a timely manner to expedite additional competition in the market.

Yours sincerely
